

# Ramsay to remove 24 million plastic items per year

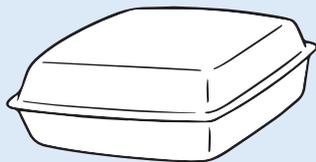

We are removing a range of single-use plastic items from Ramsay hospitals, day surgeries and clinics across Australia. 24 million plastic items per year will be replaced with environmentally-friendly alternatives by World Environment Day in June 2020.

## Single-use plastic items to be replaced:

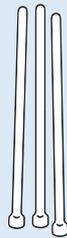

Drinking cups & lids

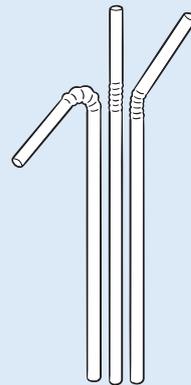

Denture cups & lids

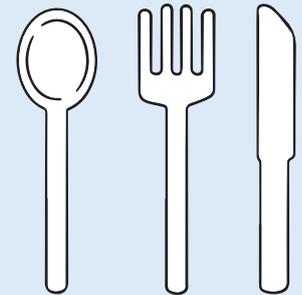

Plates

Stirrers

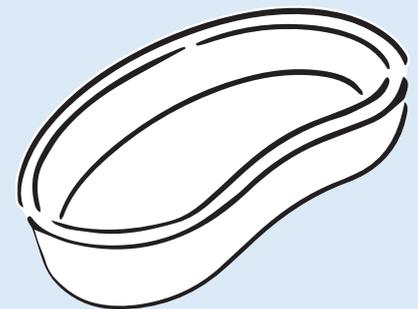

Straws

Forks, Knives & Spoons

Medication cups

Kidney dishes

Ramsay is currently investigating a range of other waste-reduction strategies to continue delivering environmentally sustainable outcomes.

We strongly believe in developing initiatives that advance the health and wellbeing of both current and future generations – and protecting the environment is a crucial part of this.

People caring for people.
